

DOMESTIC ELECTRICAL INSTALLATION CONDITION REPORT

Requirements For Electrical Installations - BS 7671 IET Wiring Regulations

Report Reference: 9CLG

1 DETAILS OF THE PERSON ORDERING THE REPORT												
Client:	Brunel Management											
Address:	Brunel Chambers , Devonshire Place , St Helier, Jersey, JE2 3RD											
2 REASON FOR PRODUCING THIS REPORT												
Reason for producing this report:												
Annual inspection												
Date(s) on w	hich inspect	ng was ca	rried out:		27/05/2021							
3 DETAILS OF THE INSTALLATION WHICH IS THE SUBJECT OF THIS REPORT												
Installation Address: 9 Clos Le Gallais , La Rue de Mon Sejour, St Helier , Jersey, JE2 4HT												
Estimated ag	je of wiring s	system:	20 ye	ars		Evidence of additions alterations:	s/ 🗆 🔍	Yes	if yes, estimated	age:		years
Installation re	ecords availa	able? (Regula	ation 651.	1)	N/A		Date	of las	t inspection:		N/A	
4 EXTENT AND LIMITATIONS OF INSPECTION AND TESTING												
Extent of the electrical installation covered by this report:												
100% of the	e circuits ir	nline with lin	nitations									
Agreed limitations including the reasons (see Regulation 653.2):												
Inspection where access is freely given. Limitation of inspection of cables installed behind ceilings and walls. No furniture is to be moved by engineers. Insulation resistance on circuits will only when we can guarantee no item on the circuit can be damaged. Bath panels are not to be removed for inspection.												
Agreed with:												
Operational I	imitations in	cluding the re	easons:									
The inspection and testing detailed in this report and accompanying schedules have been carried out in accordance with BS 7671:2018 (IET Wiring Regulations) as amended to 2018. It should be noted that cables concealed within trunking and conduits, under floors, in roof spaces, and generally within the fabric of the building or underground, have not been inspected unless specifically agreed between the client and inspector prior to the inspection. An inspection should be made within an accessible roof space housing other electrical equipment.												
5 SUMMARY OF THE CONDITION OF THE INSTALLATION												
See page 3 for a summary of the general condition of the installation in terms of electrical safety.												
Overall assessment of the installation in terms of it's suitability for SATISFACTORY												
* An unsatisfactory assessment indicates that dangerous (Code C1) and/or potentially dangerous (Code C2) conditions have been identified.												
6 RECO	MMENDAT	IONS										

Where the overall assessment of the suitability of the installation for continued use on page 1 is stated as 'UNSATISFACTORY', I/We recommend that any observations classified as 'Code 1 - Danger Present' or 'Code 2 - Potentially dangerous' are acted upon as a matter of urgency.

Investigation without delay is recommended for observations identified as 'FI - Further Investigation Required'.

Observations classified as 'Code 3 - Improvement recommended' should be given due consideration.

Subject to the necessary remedial action being taken, I/we recommend that

the installation is further inspected and tested by:

Note: The proposed date for the next inspection should take into consideration the frequency and quality of maintenance that the installation can reasonably be expected to receive during its intended life. The period should be agreed between relevant parties.
